LANCASTER, PA.

INTRODUCTION

At the 30th Congress of the American Ornithologists' Union held in Cambridge, Mass., November 11, 1912, "it was voted to publish an additional Index to 'The Auk' covering the years 1901 to 1910, inclusive," on the same plan as the 25-year Index published in 1907. The appointment of the Committee to prepare and edit the Index was left to the president, Dr. Frank M. Chapman, who on December 17, 1912, appointed Dr. T. S. Palmer chairman with power to select the members of the committee and proceed with the Index. A few weeks later a committee of 13 members was organized, with Prof. W. W. Cooke as secretary, and at a meeting on February 7, 1913, plans were perfected and the work distributed. Ten of the members undertook the actual indexing and the others the preparation of the copy for the press and the correction of the proof. The members of the committee were as follows (those who served on the former Index Committee being designated by an asterisk):

*T. S. Palmer, Chairman	H. H. T. Jackson
W. W. Cooke, Secretary	W. L. McAtee
*A. K. Fisher	*Gerrit S. Miller, Jr.
N. Hollister	J. H. Riley
A. B. Howell	John T. Tyler
*A. H. Howell	Alex. Wetmore
D. E. Lantz	

As the work progressed it became evident that much additional labor was necessary in securing full names of authors and other biographical data in order to bring the Index up to the standard of modern bibliographical requirements adopted in the former Index. Eight members were therefore added as follows:

*A. C. Bent	J. W. Franzen
*Ruthven Deane	*C. W. Richmond
J. H. Fleming	*John H. Sage
E. H. Forbush	*Witmer Stone

The Committee was fortunate in securing the invaluable aid of Dr. Jonathan Dwight, Jr., Chairman of the original Index Com-

mittee, and Dr. C. W. Richmond and Dr. Witmer Stone, Editor of the Auk, in correcting the proof. Dr. Dwight very generously offered to look over the entire proof and contributed many critical notes and suggestions, and Dr. Richmond corrected the names of foreign species and read the proof of the Biographical Index.

The full committee of 22 members was thus practically divided into three subcommittees: an indexing subcommittee of 10 members, a biographical subcommittee of 8 members, and a proof reading subcommittee of 4 members. While somewhat smaller than the committee which prepared the Index of 1907, it included 10 members who were especially equipped by reason of the experience gained in the former work.

PROGRESS OF THE WORK

The basis of this Index was a series of cards prepared by Prof. W. W. Cooke in connection with the work of the Biological Survey. These cards were rearranged according to volumes, distributed to the ten indexers to compare with the text, correct and supplement when necessary, each member thus being responsible for one volume. After the cards had been corrected they were returned to the secretary who arranged them in a single alphabet and had them copied on sheets for the press. These sheets were then returned to the indexers for comparison with the cards to insure that the copying had been done correctly. In this way each entry was checked at least twice. Indexing began promptly in February, 1913. By May about one-fourth of the cards had been returned, and at the annual meeting in November the Committee reported that the copy was nearly finished. The winter was devoted to completing the copy and making the final corrections. When the Union met in Washington in April, 1914, the manuscript was delivered to the editor ready for the press. The first proofs were received early in July, but through unforeseen and unavoidable delays, the work was not all in type until the middle of October, 1914. The necessity for care in correcting the proofs and the time consumed in having them looked over by several persons still further delayed completion of the proof reading until December and postponed issue of the work until early in 1915. In comparison with the progress of the former and larger work, the actual time consumed in preparing the 10-year Index and putting it through the press was 2 years instead of 8 years and it appears 4 years instead of 7 years after the last volume to which it refers.

PLAN OF THE INDEX

The general plan of this Index is the same as that of 1907, which was described by the editor, Dr. Jonathan Dwight, as follows:

1. "AUTHORS. Titles of papers are in chronological order and in condensed form. Reviews and notices are indicated by the abbreviation '(rev.)', which is used alone when the author is reviewed, and by the additional word 'see' prefacing the paragraph when the author is reviewer." . . .

2. "LOCALITIES. Names of authors in alphabetical order are placed under each." .

3. "GENERA. Species in alphabetical order are indexed under their respective genera, subspecies or races being, for indexing convenience, treated like species and the middle term of the trinomial dropped. Under species, the page references are arranged by states and countries in alphabetical order, and, set off by a dash, at the end of the localities are additional categories in which are put references to matters other than distribution. . . . The scientific names adopted are those of the A. O. U. Check-List [of 1910] with approved corrections to the end of 1912, and for foreign species, as a rule, partly those of Sharpe's 'Hand List' and partly those of Ridgway's 'Birds of Middle and North America' to date [of 1914]. An asterisk indicates an original description . . . and an interrogation point a reference doubtfully placed."

4. "SYNONYMS OR CROSS REFERENCES. Each refers directly to the name with which it is synonymised in this index and some are merely cross references rather than actual synonyms. Vernacular names in modern foreign languages have been discarded."

5. "MISCELLANEOUS ITEMS. Everything not provided for in the other primary divisions is included in these items, such as notices of journals and the classified subject matter of body articles under various headings such as 'Distribution,' 'Migration,' 'New Species,' 'Nidification' and many others."

6. KEY LETTERS. Each name of a species that occurs in the A. O. U. Check-List is followed by the English name given it in that Check-List. If any English or vernacular name is used for this species in 'The Auk' without a Latin name, then the key letter "a" precedes the English name in the index and this same key letter is added to every reference in which this species is mentioned without a scientific name. Following the English name is a list of all the Latin synonyms each with its own key letter. Thus under *Am-*

modramus, the species *australis* is followed by (^aGrasshopper or yellow-winged sparrow, ^b*Coturniculus*, ^c*passerinus*, ^d*Coturniculus passerinus*, ^e*Fringilla*). Under this arrangement omission of a key letter in the subjoined references indicates that the species is referred to as *Ammodramus australis*; the key letter "a" indicates that the species is mentioned by one of the English or vernacular names, without any Latin equivalent; "b" indicates the combination *Coturniculus australis*; "c" *Ammodramus passerinus*; "d" *Coturniculus passerinus*; and "e" *Fringilla australis*.

As the work progressed the committee was convinced that several changes might be made with advantage and some of the matter eliminated without serious loss but in order to have the Index uniform with the previous volume it was deemed advisable to introduce no innovations which might interfere with this object. Consequently only three minor changes have been made viz.:

(a) Use of black face type for every entry accompanied by a page reference, and the smaller Roman type for cross references. Thus greater uniformity is secured and a glance is sufficient to distinguish secondary references by the less conspicuous type.

(b) Insertion of dates of birth and death after names of deceased authors.

(c) Inclusion in the Introduction of a special Index to all the biographical matter thus far published in "The Bulletin of the Nuttall Ornithological Club" and "The Auk" in order to bring together in one place a convenient list covering all the volumes from 1876-1914.

AUTHORS' NAMES

Modern bibliographical standards require full names of authors with date of birth, and for deceased authors, dates of birth and death. In the former Index full names were obtained when possible and in the present work dates have been inserted after names of deceased individuals, but no attempt has been made to ascertain the dates of birth of persons who are still living. The same care has been exercised in preserving the full names of authors in original form as in ascertaining the original spelling of names of genera or species. In following this rule additional names of several well-known ornithologists have been brought to light. Few persons realize that John James Audubon was not Audubon's full name. He himself says in a letter to Mrs. Rathbone in 1827: "My name is

John James Laforest Audubon. The name Laforest I never sign except when writing to my wife, and she is the only being, since my father's death, who calls me by it." But all his wife's letters addressed him as Laforest.

The dropping of names may lead to confusion. Readers as a rule are not aware that the full name of George Baur is George Hermann Carl Ludwig Baur, or that articles signed by C. Hellmayr and E. Hellmayr are written by the same author, Carl Eduard Hellmayr. Neither do they remember that Allan Brooks and A. C. Brooks are both Allan Cyril Brooks, nor that A. M. Frazar and M. A. Frazar are one and the same person, unless reference can be had to some source where the names are given in full. Some authors drop certain initials, which they apparently regard as superfluous. Ordinarily this matters little but it is frequently interesting and sometimes important to ascertain an author's full name for purposes of identification. Mistakes in initials are frequent and names which are really different may through a slight error in the initials appear identical. Among the persons mentioned in "The Auk" are a number who have the same surnames with slightly different initials. Thus under Brown are H., and H. H.; under Clark, A. H., C. H., J. H., and J. N.; under Shufeldt, P. W., R. W., and R. W. 3rd, and under Watson, J. B., and J. R. The entries under Fisher represent 8 different persons whose initials are A. K., W. K., E. W., G. C., G. J., W. T. and two with W. H. A very slight error in any of these cases might be misleading but it is impossible to distinguish between William Harmanus Fisher and William Hubbell Fisher, merely by initials. In another case two writers on the birds of Vermont have identical initials, although their full names Carlton Dexter Howe and Clifton Durand Howe are quite different.

Special care is necessary to avoid confusion in the names Adams, Swainson, and Corning. Charles Francis Adams and Charles Francis Adams, Jr., were not father and son, nor were William Swainson, the ornithologist, and William Swainson his biographer. In each case the former is dead and the latter now living. The name Erastus Corning was borne by five generations in the same family and the A. O. U. member who died in 1893, the third in the list, was distinguished by "Jr." as his father was still living at that time. All such cases require dates for purposes of identification.

Reference should also be made to the rather rare cases in which an individual has taken up his residence in a foreign country and

his name has been translated or changed from its original form. Dr. Gundlach, whose name is so intimately associated with the zoology of Cuba, is usually known as John Gundlach or Juan Gundlach, but he was born in Germany and his original name was Johann Christoph Gundlach. Dr. Gustav [Ferdinand Rudolph] Radde was born in Germany but spent most of his life in Russia and his name may be found in Russian biographies in the form Gustav Ivanovich Radde. Similarly Dr. Ladislav Taczanowski's name is sometimes given as Ladislav Casimirovich Taczanowski, in conformity with Russian custom.

In all these cases the name is given in full and any part which may have been dropped is enclosed in brackets.

BIOGRAPHICAL INDEX

No attempt was made in the former Index or in the body of this index to bring together references to the widely scattered biographical notes and obituaries of ornithologists and members of the Union. To supply what seemed to be an important omission a list of these notes was arranged in alphabetical order. The obituaries vary from simple announcements of death to elaborate memorial addresses, some of which are accompanied by portraits or occasionally by a bibliography. When it was decided to bring the list down to date and include all deceased members of the Union, it was found that about sixty names were accompanied merely by the date of death, and of the 200 or more obituary notices fully half lacked some important item of time or place of birth or death. In supplying these data recourse has been had to every available source of information and much assistance has been rendered the committee by correspondents in all parts of the country and abroad. Discrepancies in statements of age and in dates are frequent, and are evidently due to imperfect information or lack of opportunity to check up the data at the time the original notices were prepared. When important discrepancies have come to light special efforts have been made to ascertain the correct data and attention is called to an apparently erroneous date by enclosing it in parentheses with the word "not." Dates of birth are sometimes uncertain and cannot be given nearer than the year. In the very exceptional case of Audubon the dates are variously assigned from 1772 to 1783, although 1780 is the year usually accepted; the day is sometimes given as May 4 and sometimes as May 5. The latter seems to be based on the best authority

and has been formally adopted by the legislature of Louisiana in selecting Audubon's birthday as the date for the celebration of Bird Day.

Further investigation is necessary to settle the various points still in doubt and to complete the comparatively meager data on which the list is based. As it stands the list contains the names of about 275 persons, many of whom have been prominent in ornithology in the last half century.

SUPPLEMENTARY LIST.

In the general Index about 175 authors' names appeared in more or less incomplete form. Some of the missing names came to light in the course of the present work and it seemed desirable to complete as many of them as possible before it was too late to collect the information. As a result of the combined labors of the committee and their correspondents, 145 names have been found. Of the 30 still missing, about one-fourth are foreign and the others with possibly three or four exceptions are of minor importance from an ornithological standpoint.

ACKNOWLEDGMENTS

One of the features of an undertaking of this kind which goes far toward lightening the routine labor is the cordial spirit of cooperation and the ready response to calls for aid manifested on all sides. Without such assistance it would often be impossible to collect the widely scattered information but with it the labors of the committee are greatly lightened and the work becomes a cooperative one to which a large number of persons contribute.

Responses from members of the Union have been prompt and generous and among those who have rendered valuable assistance are the following:

C. E. H. Aiken	G. C. Embury	John Murdoch
H. P. Attwater	A. H. Felger	A. H. Norton
W. B. Barrows	Geo. W. Field	H. C. Oberholser
W. H. Bergtold	Joseph Grinnell	E. A. Preble
Louis B. Bishop	H. K. Job	T. S. Roberts
B. S. Bowdish	Howard Jones	F. Stephens
Wm. C. Braislin	F. Kermode	T. C. Stephens
Amos W. Butler	H. L. Madison	B. H. Swales
E. A. Cleasby	R. O. Morris	A. P. Wilbur

In collecting biographical data valuable aid has been received from a number of sources not directly connected with the American Ornithologists' Union. Among these should be mentioned the Biographical Department of the American Medical Association, the Historical Society of Wisconsin and the Library of the Zoological Society of London. Among individuals are T. J. Ashe of Key West, Fla.; James Buckland of London, England; M. Vladimir Generosoff of Petrograd, Russia; Ernst Hartert of Tring, England; S. W. Linebaugh of Russellville, Ky.; Dr. Einar Lönnberg of Stockholm, Sweden; R. B. Rockwell of Denver, Colo.; Dr. Eugene Swope of Cincinnati, O.; Walter R. Welch of Capitola, Calif.; and Dr. B. B. Woodward, Librarian of the British Museum of Natural History, London. To these and all others who have rendered assistance the thanks of the committee are due.

In preparing the index cards and the copy for the press the greater part of the work has fallen on the secretary of the committee, Prof. W. W. Cooke, who has also read the proof with special reference to the accuracy of the citations under the scientific names. Finally, mention should be made of the painstaking care of the printers who have sought in every way to make the Index as accurate as possible.

T. S. PALMER,

Chairman of the Index Committee.

WASHINGTON, D. C., Jan. 1, 1915.

BIOGRAPHICAL INDEX

The following index contains references to the biographical matter which has been published in the 'Bulletin of the Nuttall Ornithological Club' and 'The Auk.' It includes the names of all persons whose obituary notices have appeared in the volumes from 1876 to 1914 inclusive and also the names of all members of the American Ornithologists' Union who have died prior to the publication of this index. The earliest death in the list is that of Alexander Wilson in 1813, consequently the period covered by the Index is almost exactly the century which has elapsed since the death of the 'Father of American Ornithology.' Among the 275 names mentioned will be found many of those most prominent in the annals of ornithology in America and Europe especially during the last 40 years.

Under each name are given six items: (1) reference to the biographical notice, (2) place of birth, (3) date of birth, (4) place of death, (5) date of death, and (6) age at death. Ages are stated in terms of the nearest year and the accompanying signs + and — show whether or not the year was completed. For example, a person who was born on January 1, 1850 and died in 1900 was 50 years old at the time of his death. If he died in June, 1900, his age is stated as 50 + to show that he had lived 50 full years and some months or days; but if he died in July, 1900, his age is given as 51 — to indicate that he was in his fifty-first year and nearer 51 than 50.

An asterisk (*) indicates that an announcement of the death of a member of the Union has been published in 'The Auk' but without any biographical notice. If such notice has appeared elsewhere a reference to the article is added.

(71+).
- Ragsdale**, George Henry....'95, 316
Born, Knox Co., Tenn., Apr. 1,
1846.
Died, Gainesville, Tex., Mar. 25,
1895 (49—).
- Ralph**, William Le Grange, '07, 461-462
Born, Holland Patent, N. Y., June
19, 1851.
Died, Washington, D. C., July 8,
1907 (56+).
- *Rawle**, Francis William,
'12, 93; Cassinia, '11, 69-70
Born, Rosemont, Pa., Sept. 22,
1873.
Died, Bryn Mawr, Pa., June 12,
1911 (38—).
- Ready**, George Henry.....'03, 327
Born, Placerville, Calif., Aug. 5,
1858.
Died, Santa Cruz, Calif., Mar. 20,
1903 (45—).
- Reed**, Chester Albert.....'13, 319
Born, Worcester, Mass., Jan. 10,
1876.
Died, Worcester, Mass., Dec. 16,
1912 (37—).
- Richardson**, Jenness....'93, 307-308
Born, Rutland, Vt., 1857.
Died, Yonkers, N. Y., June 24,
1893 (36).
- Ridgway**, Audubon Whelock,
'01, 221-222
Born, Washington, D. C., May 15,
1877.
Died, Chicago, Ill., Feb. 22, 1901
(24—).
- Robins**, Julia Stockton (Mrs. Edward
Robins).....'06, 485
Born, Philadelphia, Pa., May 12,
1865.
Died, Atlantic City, N. J. (not
Philadelphia, Pa.), July 2, 1906
(41+).
- Salvin**, Osbert.....'98, 286, 343-345
Born, Finchley, Engl., 1835.
Died, Hawksfold, near Haslemere,
Engl., June 1, 1898 (63).
- Samuels**, Edward Augustus... '08, 341
Born, Boston, Mass., July 4, 1836.
Died, Fitchburg, Mass., May 27,
1908 (72—).

(59—).
- Wray, Richard Spaulding**....'89, 206
Born, —, 1865?
Died, London?, Engl., Feb. 12
1889 (24).
- Young, Curtis Clay**.....'03, 94
Born, New York City, Nov. 2,
1874.
Died, Port Daniel, Quebec, July
30, 1902 (28—).

SUPPLEMENT TO THE TWENTY-FIVE-YEAR INDEX

When the Twenty-five-year Index of 'The Auk' was published in 1907 it was found impracticable to secure the full names of all authors. About 175 names remained more or less incomplete and of these 145 have now been obtained and are given in the following list. Those which are still incomplete are listed in 'The Auk' '15, 143. In the case of authors who are now dead the years of birth and death are given. Each name is followed by a reference to the last article mentioned in the General Index.

THE AUK

TEN YEAR INDEX.

1901-1910.

AAPTUS.

- Aaptus**, '09, 103.
Abbot, John, 1750-c. 1840.
 [Letter from], '06, 365-368.
Abbott, Clinton Gilbert.
 Summer bird-life of the Newark,
 New Jersey, marshes, '07, 1-11.
 American Coot (*Fulica americana*)
 nesting near Newark, N. J., '07,
 436-437.
 The Black-throated Green Warbler
 as a nesting species on Long Is-
 land, N. Y., '09, 80-81.
 abbreviatus (*Buteo*), see *Buteo*.
 abeillei (*Icterus*), see *Icterus*.
Abert, John James, 1788-1863.
 [Letters to Audubon], '05, 172-175.
 aberti (*Anas*), see *Anas*.
 — (*Pipilo*), see *Pipilo*.
 abieticola (*Ceophloeus*), see *Phloeotomus*.
 — (*Phloeotomus*), see *Phloeotomus*.
 acadica (*Cryptoglaux*), see *Cryptoglaux*.
 — (*Muscicapa*), see *Empidonax virescens*.
 — (*Nyctala*), see *Cryptoglaux*.
 acadicus (*Empidonax*), see *E. virescens*.
 — (*Glaux*), see *Cryptoglaux*.
Acanthis (*Aegiothus*), '01, 263, '04, 94,
 95, 422, '07, 199, '08, 399, '09, 301,
 358.
 brewsteri, *Mass.* '06, 470.—*misc.*

Unsatisfactory records, '02, 420.
brewsteri (Acanthis), see Acanthis.
— (Dendroica), see Dendroica.
— (Egretta), see Egretta.
— (Sula), see Sula.
- Bridge, Lidian Emerson.**
Northern Pileated Woodpecker in Massachusetts, '05, 414.
Protonotaria citrea at Concord, Mass. '08, 319-320.
Mockingbird in West Medford, Mass. '08, 320.
Chondestes grammacus at Ipswich, Mass. '08, 476.
Snow Geese in Framingham, Mass. '10, 78.
- Bridge, L. E., and Boardman, E. D.**
Correction, '09, 80.
bridgesi (Thamnophilus), see Thamnophilus.
- Brimley, Herbert Hutchinson.**
White-winged Crossbill at Raleigh, N. C. '07, 220.
North Carolina notes, '09, 436-437.

Northern Phalarope in Bladen County, North Carolina, '10, 206.
britannicus (Cinclus), see Cinclus.

British Columbia.

Bishop, L. B., '05, 79-80.
 Brooks, A., '04, 289-291, '05, 83, 214-215, '07, 167-169, '09, 60-63, 313-314.

Grinnell, J., '01, 144, '04, 274-275.

Norris, J. P., Jr., '02, 88-89.

British Honduras.

Thayer, J. E., '06, 460-461.

British Ornithologists' Union.

[Annual Meeting], '03, 459.

Brock, Henry Herbert.

The King Rail again near Portland, Maine, '02, 285.

The Yellow-crowned Night Heron at Portland, Maine, '02, 285.

Recent occurrence of the European Teal and the Marbled Godwit near Portland, Maine, '07, 94.

Brockway, Arthur William.

A Carolina Wren in New London County, Connecticut, '10, 213.

Brooks, Allan [Cyril].

Notes on the birds of the Cariboo District, British Columbia, '03, 277-284.

British Columbia notes, '04, 289-291.
 Clay-colored Sparrow in the Cariboo District, British Columbia, '05, 83.

Notes on the nesting of the Varied Thrush, '05, 214-215.

A hybrid Grouse, Richardson's Sharp-tail, '07, 167-169.

Some notes on the birds of Okanagan, British Columbia, '09, 60-63.

Three records for British Columbia, '09, 313-314.

Brooks, Earle Amos.

Notes from West Virginia, '08, 235-238, '09, 84-85.

List of birds found in West Virginia (rev.), '09, 327.

Brooks, Winthrop Sprague.

The Stilt Sandpiper in Massachusetts, '07, 437.

Brotogerys jugularis, C. R.

'07, 292; Panama, '01, 359.

tui, '05, 310.

Brown, Clarence Emerson.

The Evening Grosbeak at Beverly, Mass. '04, 385.

Brown, Edward Johnson.

Florida bird notes, '01, 199.

Brown, Frank Arthur.

A Florida Gallinule on the coast of Massachusetts, '07, 97.

The Cardinal at Ipswich, Mass. '09, 194-195.

Brown, Herbert, 1848-1913.

Bendire's Thrasher, '01, 225-231.

A Band-tailed Hawk's nest—An Arizona incident of biographical interest, '01, 392-393.

Unusual abundance of Lewis's Woodpecker near Tucson, Arizona, in 1884, '02, 80-83.

Arizona bird notes, '03, 43-50.

Masked Bob-white (*Colinus ridgwayi*), '04, 209-213.

The Water Turkey and Tree Ducks near Tucson, Arizona, '06, 217-218.

Brown, John Clifford, 1872-1901.

Obituary of, '01, 220-221.

Brown, Nathan Clifford.

Obituary of J. C. Brown, '01, 220-221.

The Maryland Yellow-throat and Bachman's Finch near Camden, South Carolina, in winter, '06, 227-228.

A Ruffed Grouse near Camden, South Carolina, '06, 336.

The Titlark at Portland, Maine, in spring, '06, 342.

A great flight of Robins and Cedar-birds, '06, 342-343.

A new song, '06, 461-462.

Note on the Clapper Rail in Maine, '07, 95-96.

The Raven near Portland, Maine, '07, 100.

The Spruce Partridge in the White Mountains, '09, 428-429.

Note on the Red Crossbill and the Pine Finch in South Carolina, '09, 432.

Another Pigeon Hawk in Maine in winter, '10, 207.

Brown, Wilmot Wood, Jr.

[Announcement of his departure for Panama on the John E. Thayer Expedition], '04, 407-408.

browni (Trogodytes), see Trogodytes.

Brownson, William Henry, 1854-1909.

Myrtle Warblers wintering in Maine, '04, 388-390.

The first Hooded Warbler taken in Maine, '05, 85.

Myrtle Warbler at Cape Elizabeth, Maine, in January, 1905, '05, 418.

Connecticut Warbler in Maine, '07, 105.

Notice of death, '09, 453.

Bruner, Lawrence, Wolcott, R. H., and Swenk, M. H.

A preliminary review of the birds of Nebraska (rev.), '05, 94-95.

brunneicapillus (Heleodytes), see *Heleodytes*.

— (*Picolaptes*), see *Heleodytes*.

brunneifrons (*Euphonia*), see *Euphonia*.

brunnescens (*Butorides*), see *Butorides*.

Egatheus, '08, 390.

Egret, American, see Herodias egretta.

Brewster's, see Egretta brewsteri.

Brewster's Snowy, see Egretta brewsteri.

Reddish, see Dichromanassa rufescens.

Snowy, see Egretta candidissima.

Egretta, '03, 333.

brewsteri (Brewster's Egret or Brewster's Snowy Egret), L. C. '09, 321.—syn. '09, 295.

candidissima ("Snowy Egret or Snowy Heron, "Garzetta, "Ardea), Alta. '01, 392^c; Colo. '09, 180, 285, 409, '10, 145; D. C. '04, 402^a; Fla. '04, 21^a, 25^a, 129^a, 264^a, 265, 267^a, 452, '09, 172^a; Lesser Antilles, '02, 243^c; La. '06, 7^a, 14, '08, 174; N. J. '07, 436; N. M. '09, 76; N. Y. '02, 145-146^c; N. C. '10, 309^a; P. R. '03, 22^b; S. C. '08, 313, '10, 305^a, 306^a, 307^a, 315; Venez. '02, 260^b.—hbt. '04, 265; nst. '04, 265, '08, 313; '10, 315; syn. '03, 333^c, '09, 303^a; misc. '10, 311^a.

egretta (Ardea), see Herodias.

—(Herodias), see Herodias.

egusquiae (Euphonia), see Euphonia.

Eider, American, see Somateria dreseri.

Greenland, see Somateria borealis.

King, see Somateria spectabilis.

Northern, see Somateria borealis.

Pacific, see Somateria v-nigra.

Steller's, see Polysticta stelleri.

Eifrig, Charles William Gustave.

Remarkable flight of Gulls at Cumberland, Md. '02, 75.

Northern Phalarope and Black Tern at Cumberland, Md. '02, 76-77.

Lark Sparrow and Olive-sided Flycatcher in western Maryland, '02, 83-84.

Northern birds at Cumberland, Md. '02, 211-212.

Birds of Allegany and Garrett counties, western Maryland, '04, 234-250.

Ornithological results of the Canadian "Neptune" expedition to Hudson Bay and northward, 1903-1904, '05, 233-241.

The Golden Eagle (*Aquila chrysaetos*) near Ottawa, '05, 310.

Nesting of the Raven (*Corvus corax principalis*) at Cumberland, Md. '05, 312.

A one-legged Crow (*Corvus brachyrhynchos*), '05, 312-313.

An unusual abundance of the Canada Jay (*Perisoreus canadensis*) in and near Ottawa, Ontario, '05, 313.

A curious anomaly in the White-throated Sparrow (*Zonotrichia albicollis*), '05, 313-314.

The Migrant Shrike (*Lanius ludovicianus migrans*) at Ottawa, Ont. '05, 314.

Notes on some northern birds, '06, 313-318.

Scarlet Tanager (*Piranga erythromelas*) at Ottawa, Canada, '07, 103.

Early appearance of certain northern species at Ottawa, Canada, '07, 110-111.

American Goshawk (*Accipiter atricapillus*) versus man and Barred Owl, '07, 437-438.

A long-drawn-out migration; its causes and consequences, '08, 1-9.

Winter birds of New Ontario, and other notes on northern birds, '09, 55-59.

The Grasshopper Sparrow at Ottawa, Ontario, '09, 432.

The Prairie Warbler (*Dendroica discolor*) in northern Ontario, '09, 432-433.

Additions to the list of birds of Allegany and Garrett counties, western Maryland, '09, 437-438.

A winter of rare birds at Ottawa, Ontario, '10, 53-59.

A Parasitic Jaeger near Ottawa, Ontario, '10, 204.

elachistus (Asio), see Bubo.

—(Bubo), see Bubo.

Elachura, '02, 176, 180.

formosa (^bTroglodytes formosus, ^cTroglodytes punctatus), India, '02, 181.—g. dist. '02, 181; syn. '02, 180^c, 181^c, 181^b; misc. '02, 176^c.

haplonota India, g. dist. '02, 181.

Elaenia, see Elainea.

Elaeniaeinae, '07, 360.

Elainea, '04, 314, 315, '05, 445, '07, 353, 360.

arechavaetae, Paraguay, '02, 416. chiriquensis (^bsordidata, ^calbivertex), C. R. '07, 288, 301; Panama,

Anticosti Island, '02, 174 (2); Pigeon showing bastard wing in flight, '02, 246; Stork showing bastard wing in flight, '02, 246; nest and eggs of Red-shouldered Hawk, '02, 287; nest and eggs of Ring-billed Gull, '02, 287; work of the Pileated Woodpecker, '02, 289 (2); bills of *Geospiza*, '02, 368 (3); food seeds of Galapagos birds, '02, 368 (3); species and subspecies of *Colinus*, '02, 389; species and subspecies of *Cyrtonyx*, '02, 389.

1903.

Cardinal nesting in conservatory, '03, 54; six dead crows, lying as they fell, under the pines, '03, 58; seventy-three dead crows gathered from a portion of the roost one hundred and fifty feet in diameter, '03, 58; Brown Pelican and nest in young cabbage palmetto, '03, 118; a corner of Pelican Island, '03, 118; young Common Tern, hiding, '03, 126; Common Tern on nest, '03, 126; preserving equilibrium, '03, 168; looking west from Rowland's meadows showing Transition, Canadian, Hudsonian and Alpine zones, '03, 180; Wright's Lake, southwest of Pyramid Lake, '03, 182; nest and eggs of Philadelphia Vireo, '03, 369; Laysan Finch and nest, '03, 387 (2); Laysan Finch eating Tern's egg, '03, 388; Laysan Rail eating Tern's egg, '03, 388; *Acrocephalus familiaris* and nest, '03, 391; nest of *Acrocephalus familiaris*, '03, 391; Laysan Rail on nest, '03, 393; nest of Laysan Rail, '03, 393; young of Laysan Teal, '03, 397; nest of Laysan Teal, '03, 397; anatomy of *Geospiza*, *Cocornis* and *Certhidia* [tongues], '03, 414; rocky shore Great Duck island, Me., low tide, '03, 418; young Herring Gulls and pipped eggs, '03, 423; young Herring Gulls, sixty hours old, '03, 423.

1904.

Finale of the Albatross dance—the duet, '04, 8; rookery of Laysan Albatross, '04, 11; near the Lagoon, Laysan, '04, 11; a corner in one of the Laysan colonies, '04, 13; among the Laysan Albatrosses, '04, 13; first stage in dance [*Dio-*

medea immutabilis], '04, 15; second step in dance [*Diomedea immutabilis*], '04, 15; last stage in dance—one singing, the other snapping beak [*Diomedea immutabilis*], '04, 15; portrait of young Laysan Albatross, '04, 15; young Albatross asking for food [*Diomedea immutabilis*], '04, 19; old bird starting to disgorge [*Diomedea immutabilis*], '04, 19; the arrival of breakfast [*Diomedea immutabilis*], '04, 19; *Diomedea nigripes* punishing strange young, '04, 19; nest and young of Roseate Spoonbill, '04, 23; nest and eggs of Roseate Spoonbill, '04, 23; nest of White Ibis, '04, 25; nest and eggs of White Ibis, '04, 25; bill of Porto Rican Woodpecker, '04, 53 (4); launch 'Audubon' used by warden in southern Florida, '04, 121; Bird Key, Florida, protected Tern colony, '04, 125; Sooty Terns on Bird Key, Florida, protected colony, '04, 127; Sooty Tern and young, Bird Key, Florida, '04, 127; Puffins, Martinique Rock, Maine, '04, 151; nest of American Eider Duck, Maine coast, '04, 151; Herring Gull caught by foot in spruce stub, Great Duck island, Maine, '04, 153; Black Guillemots or Sea Pigeons on protected island in Maine, '04, 153; nest and eggs of Curve-billed Thrasher, '04, 215; nest of Curve-billed Thrasher, '04, 215; Great White Heron, half grown young, '04, 261; Great White Heron, full grown young, '04, 261; nest of Louisiana Heron, '04, 267 (2); Little Blue Heron rookery, '04, 269; nest and eggs of Yellow-crowned Night Heron, '04, 269; Black-capped Petrel, '04, 383; the Farallones (except Saddle Rock) from the east, '04, 425; Finger Rock, '04, 427; Great Murre Cave, '04, 433; Gulls on nest end [of Farallones], '04, 435; a portion of the Brandt's Cormorant rookery, '04, 437; Rock Wren, '04, 441; Farallon Cormorant, '04, 441.

1905.

Cay vegetation, Great Guana cay, '05, 113; outer edge of mangrove swamp, Great Bahama, '05, 113; site of Golden Eagle eyrie, in the Badlands, Terry, Montana,

'05, 158; Eaglet fourteen days old, '05, 161; Eaglets one month old, '05, 161; Golden Eagle cyrie, Eaglets two days old, '05, 161; Golden Eagle cyrie, '05, 151; Eaglets one month and twenty-five days old, '05, 163; female Eaglet two months old, '05, 163; Brown Creeper with food in its bill, '05, 179; Brown Creeper, quietly waiting at the same height as the peak of the gable, '05, 181; wind-shaken nesting tree and its surroundings, '05, 181; Brown Creeper taking the horizontal run sideways to the peak of the outer nest wall, '05, 181; Brown Creeper's nesting tree, '05, 187; Brown Creeper's nesting site, '05, 187; Brown Creeper's nesting site, '05, 191; Brown Creeper's nest, '05, 191; Brown Creeper on nesting tree, '05, 191; nest of Brown Creeper, '05, 191; Great Auk (*Plautus impennis*), '05, 301; eggs of the Great Auk, '05, 302.

1906.

Chaetura pelagica and *Cypseloides niger* (Pterylosis), '06, 75; *Trochilus alexandri* and *Mellisuga minima* (Pterylosis), '06, 83; comparison of the wing spotting of the eastern and western forms of *Dryobates villosus*, '06, 165; site of Great Blue heronry, Yellowstone river, Montana, '06, 252; young Great Blue Heron, two months old, '06, 252; Yellowstone river, Montana, '06, 252; group of Blue-footed Boobies, '06, 379; Blue-footed Booby forcibly removed from egg, '06, 379; an old Man-o-war bird at home, '06, 383; Red-billed Tropic bird, '06, 383; head of *Larus atricilla* in winter plumage, '06, 455; head of *Larus atricilla* in full spring plumage, '06, 455.

1907.

Florida Gallinule, nest, etc., '07, 1; Pied-billed Grebe, nest and eggs, '07, 1; Loon chick and eggs, '07, 34; Marbled Godwit, nest and eggs, '07, 160; hybrid Grouse, '07, 167; nesting site of Duck Hawk on Yellowstone river, '07, 240; Pine Hills and Badlands, Yellowstone river, Montana, '07, 248; Sharp-tailed Grouse, '07, 256; nest of Mourning Dove, '07, 256; Great Blue Heron, '07,

256; nest of Long-billed Curlew, '07, 256; Badlands on Yellowstone river, Montana, '07, 248; nest of Ferruginous Rough-leg, '07, 264; young Western Horned Owls, '07, 264; Goshawk with a Sharp-tailed Grouse, '07, 264; Sparrow Hawk at nesting tree, '07, 264; Sparrow Hawk with Deer Mouse, '07, 264; a Lapland Longspur tragedy, '07, 369; Lapland Longspurs dead at Worthington, Minn., '07, 372; young Magpies in the Badlands, '07, 393; Piñon Jay haunts, Dawson Co., Mont., '07, 393; Piñon Jay fledgling in nest, '07, 395; nesting site of Say's Phoebe, '07, 395; on the plains north of Maple Creek, '07, 409; Cypress Hills, '07, 409; nests of Western Grebe, '07, 419; nesting site of Western Grebe, '07, 419; nest of Canada Goose, Crane Lake, '07, 423; young Long-billed Curlew, '07, 423; nest of Ferruginous Rough-leg, '07, 429; Prairie Sharp-tailed Grouse on nest, '07, 429.

1908.

Pine Hills at Knowlton, Montana, '08, 251; Golden Eagles, '08, 259 (3); Egg Island, Great Salt Lake, '08, 291; nest and eggs of Great Blue Heron and Double-crested Cormorant, '08, 291 (2); Colorado river bottoms near Needles, California, '08, 455; King cameos of Audubon, '08, 448.

1909.

Duck Hawk on the Palisades, '09, 168; the American Egret in a South Carolina cypress swamp, '09, 168; a Klamath Lake bird colony, '09, 171; Grebe group, '09, 172; Yellow-headed Blackbird studies, '09, 371, 372 (2), 384 (21).

1910.

Islands at Watcheshoo, Labrador, '10, 1; Piashte-bai river and lake from beginning of high land, '10, 1; nesting hole of Puffin, '10, 6; nest of Eider Duck, '10, 6; nest of Pigeon Hawk, '10, 16 (2); nest of Palm-leaf Oriole, '10, 33; fan palms showing Hooded Oriole's nests, '10, 34; nest and seven eggs of King Rail, '10, 66; nest and ten eggs of King Rail, '10, 66; J. C. Merrill (photo.), '10, 113; C. Aldrich (photo.), '10, 119; R. B. Sharpe (photo.), '10, 124; young

White Pelicans, Quill Lake, Sask., '10, 191; nest of Canada Goose, Quill Lake, Sask., '10, 195; nest of Mallard, Quill Lake, Sask., '10, 165; nest of Long-billed Curlew, Quill Lake, Sask., '10, 197; nests of Common Tern, Quill Lake, Sask., '10, 197; nests of Black-throated Green Warbler, '10, 304 (4); Florida Cormorant, '10, 310; Florida Gallinule, Lake Ellis, N. C., '10, 310; Black Skimmer, '10, 310; young Least Terns, '10, 310; Royal Terns, Pamlico Sound, N. C., '10, 310 (2); Henslow's Sparrow, Tiffin, O., June 3, 1904, '10, 334; Grasshopper Sparrow, Tiffin, O., June 3, 1904, '10, 334; Canvasback, Baldpate, Lesser Scaup and Ring-neck, '10, 394; Canvasback and two Baldpates, '10, 396.

(Maps.)

Parry Sound and Muskoka, Ont., '01, 33; range and migration of *Macrorhamphus*, '01, 160; maps showing states which have adopted the A. O. U. model law, '03, 103; map showing states having Audubon societies, '03, 110; map showing states having Audubon societies, '04, 99; maps showing states which have adopted the A. O. U. model law, '04, 101; range of *Parus rufescens*, '04, 366; ranges in California of the races of *Parus rufescens*, '04, 367; northern Bahamas, '05, 116; map of Louisiana, '06, 2; distribution of *Dryobates villosus* and subspecies, '06, 163; Custer county, Mont., '07, 244; Dawson county, Mont., '07, 244; Weld, Morgan and Adams counties, Colo., '09, 274; altitudes of Weld, Morgan and Adams counties, Colo., '09, 275; Barr Lake chain, Colo., '09, 276; map of Colorado, showing position of Salida, '10, 143.

(Text-figures.)

A graphic method of representing plumages and molts, '02, 254; anatomy of *Geospiza*, *Coccyzus* and *Certhidia* [skulls], '03, 406, 410 [alimentary canal], 413; malformed bill of Crow (*Corvus americanus*), nat size, '04, 279; routes of dissemination and differentiation of the *Parus rufescens* group of Chickadees, '04, 376; leg of Pigeon

(*Columba*) showing healed fracture, '05, 412; variations in the wing-pattern of *Larus kumlieni*, '06, 40; cards with notes, '07, 202; cards with notes, '07, 203; malformed bill of Rose-breasted Grosbeak, '07, 221; dispersal of young Black-crowned Night Herons from colony at Barnstable, Mass., '10, 162; dispersal of young Black-crowned Night Herons from colony near Washington, D. C., '10, 163.
